DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4, 6, 8-15 and 18-23 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claim 1 is the claimed method step of establishing at least one dimension of at least one groove disposed on the one or more hydrodynamic bearing surfaces, including determining a ratio of a width of at least one hydrodynamic groove to the distance between the at least one hydrodynamic groove and at least one adjacent hydrodynamic groove. It is this step found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claim 4 is the inclusion of the method step of establishing at least one dimension of at least one groove disposed on the one or more hydrodynamic bearing surfaces, including determining at least one of a width, a depth, and a position of the at least one hydrodynamic groove with respect to the at least one reference plane. It is this step found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claim 6 is the inclusion of the method step of establishing at least one dimension of at least one groove disposed on the one or more hydrodynamic bearing surfaces, including establishing the dimensions of at least one feature including determining the reference plane from data acquired during the measuring of the surface of the one or more hydrodynamic bearings and establishing the dimensions of the at least one feature, including establishing a distance from the reference plane wherein the distance defines a leading edge or trailing edge of at least one hydrodynamic groove. It is this step found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claims 8-15 is the claimed method step of determining the angular position of the hydrodynamic grooves along the circumference of the hydrodynamic bearing with respect to the longitudinal axis. It is this step found in each of the claims, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 18-23 is the inclusion of the limitation of determining at least one of a width, a depth, and a position of the at least one hydrodynamic groove with respect to the at least one reference plane. It is this limitation found in each of the claims, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.
